

ON WHICH SIDE DO YOU STAND IN THIS REAL TUG O'WAR?

In the face of an international crisis which may flare up at any second into war, organized opposition to world strife, embracing the largest possible number of people, becomes a matter of absolute necessity. The City College Anti-War Conference was called for the very purpose of organizing the entire student body in opposition to war, of spreading the movement to the great majority of students whose present disinterest hastens the coming of war.

The Faculty has refused permission to elect classroom representatives and to publish a bulletin advertising the Conference. By this action, it has definitely attempted to negate the fundamental purpose of the Anti-War Congress; it has definitely attempted to destroy an effective anti-war movement.

The present method which allows any student to be a voting delegate limits participation in the Anti-War Conference to the number which can find seats in the Great Hall. Election of representatives from each classroom and club would have aroused the student body from its fatal indifference. But the Faculty voted in favor of this indifference.

The arrangements Committee has asked permission to circulate the resolutions passed by the Congress in every classroom, where after an hour's discussion, they will be put to the vote.

Dean Gottschall has already stated that franchise for this action will depend on **WHAT THE RESOLUTIONS SAY**. The Faculty will not meet before the Anti-War Conference, but will consider the proposal only after the Congress adjourns!

The stark reality of war makes it imperative that every student in the College vote on **ALL** the resolutions adopted at the Conference! The imminence of a murderous holocaust necessitates that the City College Anti-War Conference be successful!
