# WELCOME

YOU are entering one of the greatest colleges in the country. It is our sincere hope that your four <sup>years</sup> will be very pleasant and that you will derive all the benefits the school has to offer.

NATURALLY you must put your right foot forward at the very start. Do not make any mistakes that may mar your college career. The greatest error of entering freshman is being taken in by the Military Science Department. The vast majority of the students are whole-heartedly against the ROTC, which is therefore trying to rope you in before you really have a chance to find yourselves. The ROTC has a rather low opinion of the freshman's mentality to think that it can seduce him with hot dogs and a pretty uniform.

MILITARY SCIENCE, while offering you no benefits, takes away time that could be better spent in additional study of your major subject. And once you take a military science course, you're stuck, because YOU RECEIVE NO CREDIT UNLESS YOU COMPLETE THE FULL TWO YEAR COURSE! If you have already signed up for ROTC, it is very easy to change at registration.

STUDENTS oppose ROTC because of the dangerous militarist doctrines it teaches. One half of the amount appropriated and spent for ROTC could easily provide for the much needed free books for the college. Higher Education is more worthy than war propoganda.
