VOTE STUDENT UNION!

Once again the students of City College are asked to elect their class and college officers. But now for the first time they are given a group, representing the broad mass of progressive student opinion, for which to vote—the Student Union Party. The men who are candidates on this ticket represent all phases of college activity: Student Council, class councils, athletics, dramatics, clubs, House Plan, publications, and social functions. The people running on the SU ticket are known to their classmates as those who have consistently been active in extra-curricular activity.

But this is not all. There are other affairs which must concern us as people who will one day actively participate in the life of the world outside the "cloistered college walls." It is for that reason that the SU platform calls for the fight against war, fascism, and reaction on our own campus. It is for that reason that we feel that you should vote for those who have the courage and determination to stand up for their convictions despite pressure from the administration.
